# Sampurna Gold

SAMPURNA GOLD is a mixture of essential elements like Iron, Magnesium, Zinc, Copper, Molybdenum and Boron. It supplies balanced nutrition to the plants through foliar spray and takes care of hidden hunger which can not be easily seen through symptoms on the crops. It helps in making available NPK to the plants, which otherwise is not fully available. Use of SAMPURNA GOLD increases the yield as well as improves the quality of the fruits etc. In many cases its use is found to take care of the damage likely to be caused by many insects, pests and diseases due to developments of resistance in the plants.

SAMPURNA GOLD Kit contains essential elements like Iron, Magnesium, Zinc, Copper, Molybdenum and Boron.
